

✦ NEXT-GEN MAC VOICE ASSISTANT •

Meet WhisPURR.

Your thoughts, seamlessly translated into work.

WhisPURR stays quietly in the background as you move between applications and modes. Speak naturally, and it automatically shapes your words to where you are.

Full Waveform

> _ MODES SURVEY

Developer Blueprints.

- Pick how WhisPURR structures your technical prompts and terminal commands.

< Left

Clear

The full instruction, plainly written.

Concise

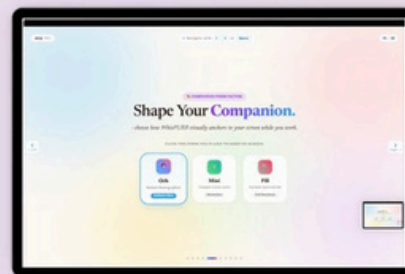

The fewest words and command flags.

Structured

Goal, code changes, and verification.

> Right

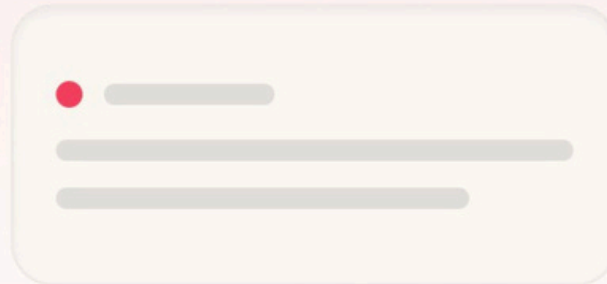

MODES SURVEY

Chat Registers.

- Choose how WhisPURR adapts your voice for fast-twitch channels like Slack or Teams.

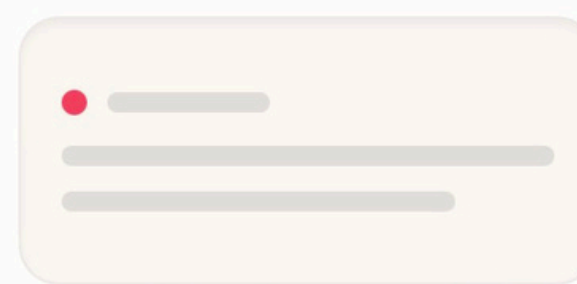

< Left

Right >

Clear

Clean sentences; essential shorthand kept.

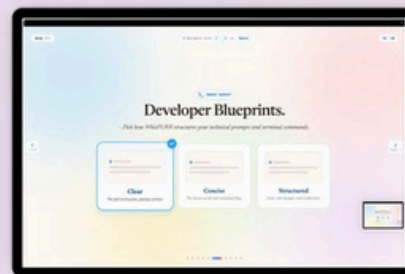

Casual

Natural lowercase workplace shorthand.

Formal

Everything spelled out and articulated.

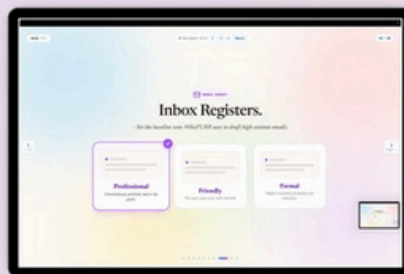

- Pick WhisPURR's default structural baseline when prowling through other applications.

*Cleaned up, but authentically your
voice.*

Compressed to rapid bullet fragments.

Composed, articulate complete sentences.

 MODES SURVEY

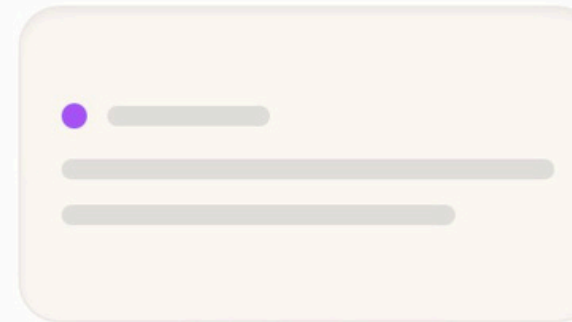

Inbox Registers.

- Set the baseline tone WhisPURR uses to draft high-context emails.

 ← Left

Professional

Conventional, polished, and to the point.

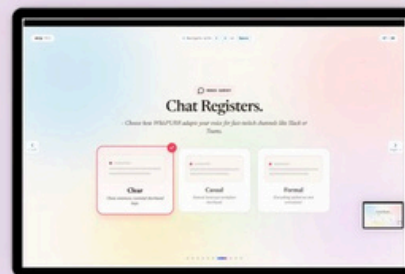

Friendly

The exact same note, with warmth.

Formal

Highest executive formality and structure.
