

## Product positioning:

Kivi is a **bridge between what you want to say and how you need to say it**. It is made for people who constantly switch between WhatsApp, email, client messages, and AI tools, each needing a different tone and format. This means always interrupting your workflow to type and reformat. Kivi tries to solve this problem. It **saves time and lowers the mental burden**. Talk the way you normally do, and Kivi changes your words to fit the app or website you are using. It does not speak or act on behalf of you. **It simply makes sharing your thoughts quicker and less frustrating**. It is always there, without feeling like another app, another step, or another burden.
